

The spiritual and educational work carried out at the department was carried out on the basis of the spiritual and educational plan of the rector of the institute, which will be held during the academic year 2017-2018, approved by the faculty on July 28, 2017

In 2017, groups led by curators will take part in “memory lessons” dedicated to the memory of the first President of the Republic of Uzbekistan Islam Abduganiyevich Karimov, as well as the slogan “We want you to be Uzbekistan!” in all groups in connection with the 26th anniversary of the independence of our country. The teachers of the department participated in organizing and conducting spiritual and educational events dedicated to the 80th anniversary of our institute

A good tradition - every year under the slogan "Attention to literature - attention to spirituality and the future." It should be noted that this spiritual and educational event is aimed at informing the public about the importance and achievements of literature on the development of literature, fostering the culture of the reader of our people, including improving the dialogue between artists and readers, fully compensating for its effectiveness

Department staff presented artwork on behalf of the department in order to enrich the library of the Institute.

The teachers of the department always respect the honorary teachers and staff of the department and wish them a happy birthday.

The department has been working for many years and teachers as Professor Z.A.Nazarova has been working with student to achieve the efforts with her knowledge. At the meeting, Z. Nazarova told about her research at the department. From 1989 to 2003 she headed the department. In 1996 he defended his doctoral thesis. Z. Nazarova has published more than 150 scientific articles, 10 preliminary patents, positive inventions, 9 Temporary Pharmacopoeial Article, 2 textbooks and about 40 manuals

March 8, teachers of the department took part in the celebration of International Women's Day.

Under the slogan “My contribution to the transformation of our curriculum into spiritual and educational enlightenment”, students will be able to improve the area of student buildings and student dormitories, landscape gardening, in order to ensure active participation in the activities of trees and carpentry works of the Department took part in the Botanical the garden.

Professors and teachers of the department made a speech at the scientific-practical conference "The contribution of Abu Ali ibn Sina to the development of the pharmacy".

Department staff took an active part in the event dedicated to the 9th of May in memory and honor. The department held meetings and celebrations with retired teachers who received gifts from the Institute and talked about a cup of tea.

Student residence

Department of Producing Pharmaceutical Drugs on August 28, 2017 at a meeting of the department approved the hostel plan and worked on the approved plan. List of students living in the "Student residence" was created according to 31-40 rooms.

In September, the head of the department P.PH.D, Ph.D. Kariyeva, associate professors and students talked about the achievements of the 26th anniversary of Independence of Uzbekistan. Independence is a great law. The people who did not use it and did not try to strengthen it, do not deserve independence. Advanced information and communication technologies, in particular mobile phones, reach customers with the label "Made in Uzbekistan". Do you mean plants that produce refrigerators, air conditioners, vacuum cleaners, furniture accessories or building materials? And who controls these enterprises with high technology, knowledge and skills? Of course, our sons and daughters, who were born in the years of independence and today are free to speak two or three foreign languages, are at the center of their beloved homeland. These are great blessings and achievements of our independence, and we are proud of them.

On the direct initiative of our president, a specific strategy aimed at harmoniously developing youth was implemented. As a result, at the level of developed democracies, the sector was radically repaired with a strong organizational, legal, logistical and personnel infrastructure that meets the highest moral and ethical requirements. In particular, the 1997 Law on Education and the National Training Program, adopted in 1997, provide for the introduction of the “integral” Uzbek model of economic and political reforms based on the gradual and evolutionary development of the new society as part of great successes.

The introduction of advanced methods of teaching modern pedagogical and information and communication technologies, the modernization of the system of teaching young people in foreign languages, the creation of conditions and opportunities for youth development and the development of international cooperation and dialogue. The resolution “On measures to further improve the system of teaching foreign language” led to a new level of work in this area .

In October, Associate Professor of P.Pharm.D. Doctor of pharmaceutical science. Sh.F.Iskandarova and teachers of the department together with students and teachers organized October 1st round table on "Teacher's Day", dedicated to Teacher's Day. As a teacher, deep emotional reverence, respect and reverence for each person, as well as a sense of duty that cannot be measured or attributed to any wealth. If we follow the advice of our teachers and the elderly, we will be on top. This is what we do for our mentors and teachers. "The life of the Master is immortal, because the lives of the disciples are connected with it." Yes, a very good idea. A teacher is a teacher who is so blessed that his name and his life are always eternal. Teacher and mentor! Regardless of our age or profession, when we hear these words, we have only the warmest thoughts and vivid memories. So, the teacher is the one that first gave us a pencil in his hands, and one that helps us in life to solve any difficult problems.

In November, an assistant of the department N.Abdukhalikova and professors' teachers and students spoke about the well-being and peculiarities of our well-being. First of all, prosperity begins with the heart. A man whose faith is good, his heart is pure, his heart is honest, his rightness is right, and his heart is good, and he is full of heart. The concept of “prosperity” has spread from the heart to the family, then to the neighborhood and to the country. Observation of the mirror of happiness is the basis of our observation of the example of true life. It is a fact that for thousands of years, ancestors, descendants, parents and children inherited excellent relationships that are not repeated in all corners of the globe and that our humanity is a fundamental law.

In all cities and villages of the country modern sports facilities are being built that meet modern international standards, which makes it possible for millions of young people to go in for sports regularly.

Much work must be done to transform the standards of living and prosperity into our way of life. He is inspired by the beauty of our country.

In November, professor. Z.A.Nazarova, associate professor. G.Tureeva, assistant N. Azimova held a round table on the theme “Healthy lifestyle at the institute - the basis of education at the institute” with students living in rooms at the department.

On December 7, 2017, the assistant of F. Makhmudov held a conversation on the topic “Constitution Week”, devoted to the Constitution Day of the Republic of Uzbekistan with students living in a hostel for 31-40 people. Department staff and students participated in the conversation.

It was noted that the Constitution of the Republic of Uzbekistan is the main legal basis for improving the effectiveness of reforms in the country in the field of human rights and interests, strengthening peace, harmony and harmony, sustainable development of our economy and population welfare. Our Constitution is first of all a guarantee of our freedom, independence. The principle of equality of all citizens living in Uzbekistan, regardless of their nationality, language, religion or social origin, is set out in our Constitution. Everyone has the right to education, work and medical care. Before the 25th anniversary of our Constitution, all segments of the population, especially young people, are actively involved in the activities of enterprises, organizations, communities and educational institutions.

In December, the assistant N.Sh.Radjapova, together with the teachers and students of the department, checked the cleanliness of the room”. We talked about drug abuse, alcoholism, tobacco smoking, and elections to district councils of people's deputies in Tashkent. In their speech, community and medical professionals around the world are concerned about the growing number of drug addictions among the population. Drug addiction is a common problem. Drug addiction is a terrible and painful period for humanity and society. Unfortunately, today the number of drug addicts is growing. Drugs destroy our society and destroy our future youth. Drug traffickers introducing various harmful substances into the blood vessels “take over” various criminal cases and cause economic damage to our people and our state. At the same time, mortality is reported due to the fact that drug addicts are regularly infected with their bodies, and in some cases overweight to more narcotic substances. Drugs destroy our society, the future of our youth.

In our country, representatives of state and non-governmental organizations constantly on the radio and television and other mass media call for combating this evil. Yes, the drug situation is really serious. In particular, the growth of drug addiction among young people and the involvement of some adolescents and schoolchildren in this serious illness affect not only their parents and relatives, but also our society. Therefore, drug addicts pose a serious social danger to society.

For example, drug addicts commit various crimes under the influence of drugs causing harm to society. At the same time, there are many cases of deaths after drug use. In addition, the use of non-sterile syringes is the cause of infection with AIDS, hepatitis B and C.

In January, the department of the Technology of Producing Medicines, associate professor N.M. Rizeva and the head of the department, professor Y.S.Kariyeva, students, professors and students of 31-40 rooms of a student dormitory held a conversation on the topic January 14, "Defender of the Motherland" and "The honor of the elderly in our country."

September 6, 1991. An unforgettable day was recorded in the history of our Motherland. On the same day, the Ministry of Defense of the Republic of Uzbekistan was established. On January 14, 1992, it was decided to transfer all units and subdivisions in the territory of an independent state to Uzbekistan

This document, issued at the initiative of the head of state, has provided wide access to a long-term program of reforming our army based on the comprehensive elimination of threats arising in the region.

This document, issued at the initiative of the head of state, has provided wide access to a long-term program of reforming our army based on the comprehensive elimination of threats arising in the region.

That is why every year on the 14th of January a solemn ceremony of celebrating the Day of Defenders of the Fatherland is held throughout the country

The head of department of the Technology of Producing Medicines, Doctor of Pharmaceutical Sciences Y.S.Kariyeva, teachers and students of the department continue the conversation on the topic “Respect for the elderly in our country”, and care for the elderly is an integral part of our spiritual life, simply one of the highest qualities of our nation.

As part of the implementation of the State Program “Year of Care for the Older Generation”, the living conditions of 7,700 war and labor veterans, single and socially needy elderly people have been improved. Compensation for utilities for them amounted to 2.6 billion soums. More than 205 thousand medical examinations of veterans were conducted. In addition, financial support was provided to pensioners.

In February, department of the Technology of Producing Medicines professor Z.A. Nazarova, Head of the Department, Doctor of Philosophy Y.S. Kariyeva talked with students of 31-40 rooms of the student dormitory on the topic “Preservation of Nature Networks”.

The sun, the sacred land, the fresh air, the lush water and the bounty of its light - all this is a unique miracle of nature.

From this birth, people can enjoy these blessings. That is why we call him Mother Nature. In our country, we have a lot of work to preserve nature. In recent years, our country has created a legislative framework for the protection of the environment and the rational use of natural resources. Laws "On Nature Protection", "On Protected Natural Territories", "On Subsoil", "On Water and Water Use", "On Protection and Use of Flora and Fauna", "On Application of Flora and Fauna".

The Cabinet of Ministers adopted a resolution "On the Program Action on Environmental Protection in the Republic of Uzbekistan for 2013-2017, adopted by the Cabinet of Ministers on May 27, 2013, which provides for the introduction of waste-free technologies in industrial enterprises, specific projects are being implemented for the transportation of vehicles for cleaning fuel flow.

In March, the assistant of department of the Technology of Producing Medicines N.X. Aripova, teachers of the department and students living in the 31-40th room of the student room, were interviewed on the topic “National clothes and national spirit”.

Plastic culture is a manifestation of appearance, spiritual world, aesthetics, moral qualities and potential. Looking at the culture of clothing, beauty, elegance and attitude of a person are also expressed. It should be noted that in today's fast-paced world, clothing and clothing demand are changing. First of all, parents should pay close attention.

Some young people, striving for fashion, wear narrow, open, short dresses, which is not always right. They do not know that these dresses do not correspond to our Uzbek culture, our mentality. Unfortunately, it is not possible to comment on the clothing culture of today's youth. Because today's clothes are moving away from our mentality. In fact, the culture of clothing is an integral part of our Uzbek culture. The seriousness of this problem is that it has become one of the main themes of the modern world.

First of all, it is important that parents take care of their child and control him so that the problems and negative thoughts mentioned above do not arise. It should be noted that the majority of our girls are an example and our young men remain true sons of Uzbekistan, who remember that the culture of clothing is the most important element of our statehood.

In March, an assistant of the department Sharipova I.Sh., teachers of the department and students living in the 31-40 m room of the student dormitory talked on the topic “March 21 - Navruz Holiday”, celebrating the holiday of Navruz, which later became a tradition of semi-nomadic and nomadic Turk people. Many centuries later, celebrated Navruz celebrations in different countries, adapted to their lifestyle and ideology. Historical sources say that the celebration of Navruz was one of the greatest holidays in the Usmans’ Empire and in the peoples of Central Asia, Iran and Afghanistan.

On the first day of Navruz, children in the countryside sang songs about Navruz at the door of the house. The owner of the house gave them presents and food. The children shared with the food in the village with the widow. This tradition is preserved in some villages of the Samarkand and Jizzakh regions. Navruz is not only a holiday of the new year, it is a labor day.

In April, Associate Professor N.S. Fayzullaeva, teachers of the department and students living in 31-40 rooms talked "Crime Prevention". In 2017, the crime rate among young people by 2016 decreased by 9,698 people or by 14 percent, of which about 23 thousand were covered throughout the country, of which 759 or 3 percent of the total number of vocational colleges and academic lyceums of the total number of students 273 or 1.1% of students, 8935 or 36% of the unemployed, inactive young people, are not the result of our work.

The responsibility of parents for raising children is set forth in Article 64 of the Constitution of Uzbekistan. According to him, parents are obliged to take care of their children and take care of them until they come of age. However, an analysis of the involvement of parents in the prevention of juvenile delinquency and juvenile delinquency showed that 42.8% of parents were neglected, and 48.7% did not educate children properly.

April 12, 2018. Head of the Department of the technology of the producing medicals professor Y.S.Kariev, professor Z.A.Nazarova, students of the department, professors, teachers and students living in 31-40 rooms, spoke about the "Day of the Department" and about the life and scientific activities of the department. The Department of Technology of Medicinal Technologies is one of the leading scientists in the field of pharmaceutical practice and is the main specialist. The department was founded in 1934 under the name "Technology of medicinal forms and herbal medicine" at the Tashkent Medical Institute. The head of the pharmacy in TashSMI named after K.R.Rubin and his collaborators M.R. Freerman and Ya.D.Kutik took the initiative. In 1941 the department was expanded and headed by Doctor of Pharmaceutical Sciences, Professor Z.M. Umansky. The teaching staff of the department consisted of 7 people.

Since July 2014, Professor Karieva.S is the head of the department. Currently, the department has a qualified, experienced and scientific-pedagogical staff.

In May, Senior Lecturer F. Umarova, with professors, teachers and students living in the dormitory in 31-40 rooms, spoke about the topic “Human Dignity and His Holiness the Holy,” dedicated to the 9th Day of Memory and Honor. The interview was attended by staff members and students. “The memory of the thousands of our compatriots who died during the Second World War, our grandfathers who survived the fire, difficult times and difficulties, and the faith of all our compatriots became a national treasure” said the distinguished president of Uzbekistan in an honest interview with reporters. I was particularly impressed by the idea that our ancestors did not die on some hill, some great devil, but above all for their homeland, their parents, their loved ones and their children.

In June, department of the Technology of Producing Medicals Assistant A.S. Normuradov talked with students living in the 31-40 rooms of the faculty, professors, teachers and students of the department to expose religious extremist, terrorist and fundamentalist ideologies and views, the main goals of the trends that promote inter-ethnic and religious conflicts round table. Uzbekistan has long been a country of peaceful coexistence with different peoples of different nationalities.

Currently, over 31 million people of more than 130 nationalities live in Uzbekistan. More than 94% of citizens believe in Islam. In recent years, crippling streams have exploited young people in the exploitation of labor migrants, the organization of “hostels”, the electronic distribution of religious extremist content and the promotion of the Internet. Especially on the Internet, propaganda about the “Islamic State” (ISHID), “terrorist organizations” called “Jabhat al-Nusra”, is a group of “mojaheds” fighting for Islamic development and we are witnessing the fact that many Muslims from all corners of the world go to Syria and Iraq to join this group, saying that Muslim youth “emigrate” and participate in “jihad”.

Propagandists encourage young people to leave their homeland, live in peace and tranquility with the sincerity of Islam, the religion of Islam, adhan, Friday prayers. Extremist movements make extensive use of social networks and the Internet to attract new members. Some of our young people were recruited via the Internet by fanatical groups such as “Islamic State”, “Obid-Kori”, “Abduvali-Kori” and “Rafiq Kori”. There are cases of storage and listening to the speech of the leaders of these groups among young people. For this reason, we must prevent the spread of slander and resist those who are trying to disrupt the well-being of our homeland.
